

GFL will be performing waste / recycle audits in Bon Accord between May 15 and August 15, 2018.

You will see university students, who are in Environmental Studies sorting through your bins and looking at your recycling.

This is an educational program aiming to help residents to understand proper sorting for what should go where and to help with waste diversion to keep as much out of the landfill as we can.

Improper sorting could increase costs, litter and collection services.

We are hoping to:

- encourage proper waste set out of carts and bags at the curb,
- encourage proper waste sorting by households,
- be available to answer questions from residents while auditing, and
- gather information on common waste questions to improve information provided to residents.

After auditing your bins we will be leaving behind:

- thank you stickers on your bins to those who sorted properly, or
- oops door hangers to let households know which items they could have set out differently.
